A proven system to get your first paying client

Freelancing Guidance & Interview Prep

Find clients and deliver projects with confidence

Portfolio & Career Launch Support

Build a portfolio that attracts and converts real clients

Meet the Mentor

Abbaz Uddin

AI Website Development Head,
Growth Scraper

Hi there,

I'm Abbaz Uddin, Founder of Imli Strategy, a website and AI systems agency building high-converting digital products for real businesses.

With 7+ years of experience in web and digital, I now build using modern AI tools like VO, Replit, Vercel, and Cloudflare, delivering faster and smarter results for every client.

Teaching is my passion. I've trained 75+ students and I believe anyone with clarity and the right system can build a powerful website without writing a single line of code.

This program uses the same frameworks and tools I use for real client projects no theory, just what works today.

Why UI/UX Design is the Most In-Demand Creative Skill

Every Indian business needs a website

Agencies charge ₹30,000 or more for a basic website

Entry-level web roles pay ₹6 to 12 LPA

Freelancers earn ₹30K+ per project

Non-technical people are now building and selling websites with AI

This Program Was Built for People Like You

Freshers

Anyone looking to start a career in the digital space

Students

Build real projects and graduate with a strong portfolio

Freelancers

Start offering website services and earn your first client

Career Switchers

Build and control your own website without hiring an agency

Marketers

Expand your skill set and deliver websites for your clients

Learn What Actually Gets You Clients & Paid Projects

01 Digital & AI Foundations

Understand how the internet, hosting, and modern AI website ecosystems actually work.

02 Website Building Models

Compare coding, low-code, and AI-driven approaches to build with clarity.

03 AI Tools, Prompting
